

ASSETS 2005

October 9-12: Baltimore, MD, USA

The Seventh International ACM SIGACCESS
Conference on Computers and Accessibility

*The Association for Computing Machinery
Special Interest Group on Accessible Computing*

Computer and Information Technologies have redesigned the way modern society operates. In particular, they have identified new avenues to assist individuals with special needs and provided tools and resources to alleviate the traditional barriers encountered by persons with disabilities. For example, speech generation systems have assisted persons with visual disabilities, voice recognition has helped people with motor impairments, multi-modal presentations have been shown to be effective in helping people with learning disabilities understand information.

The ASSETS series of conferences is aimed at providing a technical forum for presenting and disseminating innovative research results that address the use of computing and information technologies to help persons with disabilities.

Important Dates

Papers

- Submissions: *15 April 2005*
- Acceptance notification:
15 May 2005
- Camera-ready due:
15 June 2005

Demonstrations, Posters, Panels, Doctoral Consortium

- Submissions: *21 May 2005*
- Acceptance notification:
5 June 2005
- Camera-ready due:
15 June 2005
